

RAMYAR SHIMI CO.

Chemicals For Petroleum Industries

ML 70 : OIL SPILL DISPERSER

ML 70 is a blended hydro carbon biodegradable product with high dispersing efficiency and low Toxicity used for speedy removal of oil and grease from surface of sea, river bilges, decks, tanks, etc.

ADVANTAGES :

Biodegradable and having low Toxicity for use on sea, beaches and river.

Disappear oil from sea, river, and deck surfaces rapidly.

Minimize the danger of fire on shore.

Minimize the pollution from living area and where the evaporators is used for drinking water to prevent difficulties for the system.

APPLICATION :

For use on oil spills that may occur during loading of cargo or bunker.

Dispersing and clearance of crude oils and its derivatives which is spilled on deck, ships, bilges, etc.

DIRECTION

Oil spills at sea

The oil should be run to the limited area by low pressure of water to the sea surfaces then ML 0 undiluted spraying to clean up oil from the area. **Oil on beaches and shore line**

ML 70 should be spraying over the area which is covered by the oil and allow to remain sometime to absorb then follow by washing down the beach or rock.

Tank cleaning

ML 70 can be used as tank cleaner and it can be used by injection at 0.1 to 2% or recirculation at 1 to 5% .

For other application can use one of the above procedure.

SPECIFICATIONS

Visual inspection : Dark amber liquid

Composition : A blend of special solvents with Nonionic and Anionic detergents and emulsifiers.

Flash point : more than 65c

Stability : stable after repeated freeze – thaw cycles

Specific gravity : 0.85 – 0.90
